

Clean Smart Ultra

8084

Cleaning solution for conveyor belts and material lines in industrial coating systems for dried water-based coating residues for industrial use

PRODUCT DESCRIPTION

Product numbers

8084000210

General

A cleaning solution with good dissolving power for dried water-based coating residues, particularly for industrial use. Suitable for filling belt washers (offers a long service life) and recommended for cleaning conveyor belts and flushing material lines. Through strong dilution with water, the VOC content is significantly reduced.

Application area

Cleaning of spraying machines, material-carrying lines in coating systems and transportation belts when working with water-based coatings.

Cleaning fluid for filling belt washers.

PROCESSING

Processing instructions

- Please stir the product before use.
- The temperature of the product and object, and the room temperature must be at least + 15 °C.
- Clean Smart Ultra (8084) must be mixed with water before use. Depending on requirements and the degree of soiling, an addition rate of 1.5% to a maximum of 3% Clean Smart Ultra (8084) is possible.
- After cleaning spraying equipment such as cup guns or airless sprayers, rinse them with water.
- Any change in the processing sequence, environmental conditions, non-observance of instructions or the use of products not listed may have an unfavourable effect on the result.
- Please follow our **ARL 150 - Working guidelines for water-based furniture coatings**.

Quantity to be added

Addition rate: 1.5% to max. 3% to water

The quantity to be added will vary according to the area of use and equipment used. Therefore please contact your sales representative.
